DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, 3, 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Ekvall USP 1,726,657. Ekvall discloses all of the claim limitations in a similar device comprising a(n):

- First and second parallel, spaced apart conveyors (3, 6)
- Shuttle (9) having a pair of parallel arms (13, 17; fig. 1)
- First stop member (14)
- Second stop member (fig. 3)
- Platform (fig. 1)

Allowable Subject Matter

3. Claims 4-6, 8-17 are allowed over the prior art of record.

Response to Arguments

4. Applicant's arguments filed have been fully considered but they are not persuasive.

In response to applicant's argument the examiner notes that the arguments are drawn generally toward what the claimed device does or how is operates.

Art Unit: 3651

The applicant argues that Ekvall does not disclose a shuttle that is operable among a first hold position, a first release position and a second release position, and the applicant argues the claim specification call for the shuttle to be located so that a specimen carrier bypasses the first stop member and is moved downstream through the shuttle arms on the first conveyor and that the transfer apparatus is designed for use on a dual conveyor track. Additionally, The applicant argues that Ekvall does not disclose a dual conveyor track.

In response the examiner notes that Ekvall discloses all of the claimed structural limitations and therefore anticipates the claim.

A recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. In a claim drawn to a process of making, the intended use must result in a manipulative difference as compared to the prior art. See *In re Casey*, 370 F.2d 576, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 312 F.2d 937, 939, 136 USPQ 458, 459 (CCPA 1963).

Lastly, the examiner points to fig. 3, which discloses a dual conveyor track. Ekvall discloses a first and second parallel, spaced apart conveyors (3, 6)

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
